Sourcing Entertainment Training

Malaysia's leading regional trade fair for
the automotive service industry targeting
trade visitors from ASEAN

A significant edition at a pivotal time in Malaysia's transforming automotive market

Automechanika Kuala Lumpur shifted from a biennial event to yearly. The strong levels of engagement from participants emphasised its reputation as a platform for business exchange, education, and entertainment, injecting vitality into Malaysia's transforming automotive aftermarket and lifestyle trends.

Automotive Mobility Solutions Zone and Conference

The debuting zone created synergy between product sourcing and information exchange. Exhibitors presented cutting-edge technologies and solutions for new energy vehicles. The related conference explored the industry's shift towards electrification and digitisation, as well as automation and manufacturing, logistics, and supply chain which attracted over 470 attendees including company directors, procurement managers, solution architects, and R&D engineers from corporations and institutions like AutoX3, Nottingham University, Petronas, Siemens, and Sime Darby.

35 speakers and supporters:

A hub for global business exchange
